The Benefits of Using a Bed Bug Inspection Dog

- Specialty trained k-9s have a history and reputation for solving and identifying problems unidentifiable to the human eye
- Find bugs with pinpoint accuracy - much more accurate than human counterparts
- Shrinks large areas into more manageable locations within a home or business
- Allows for inspection of very complex environments
- Helps to reduce the use of pesticides based on specific bed bug locations

The Benefits of Using a Bed Bug Inspection Dog

- Dogs can identify activity behind walls, under carpeting, etc.
- Can discern live bed bugs from eggs
- Helps save substantial time and unnecessary treatment expenses
- Calms fears and brings confidence by identifying the extent of an infestation
- A BED BUG FREE CERTIFICATION can be issued if no activity is documented.

Canine Accreditation

This certifies that

Gary Broberg & Labrador "Bella"

*are certified as a Handler & Canine Team in
accordance with the standards outlined in the
NPMA Best Management Practices*

Allen Hunt - President

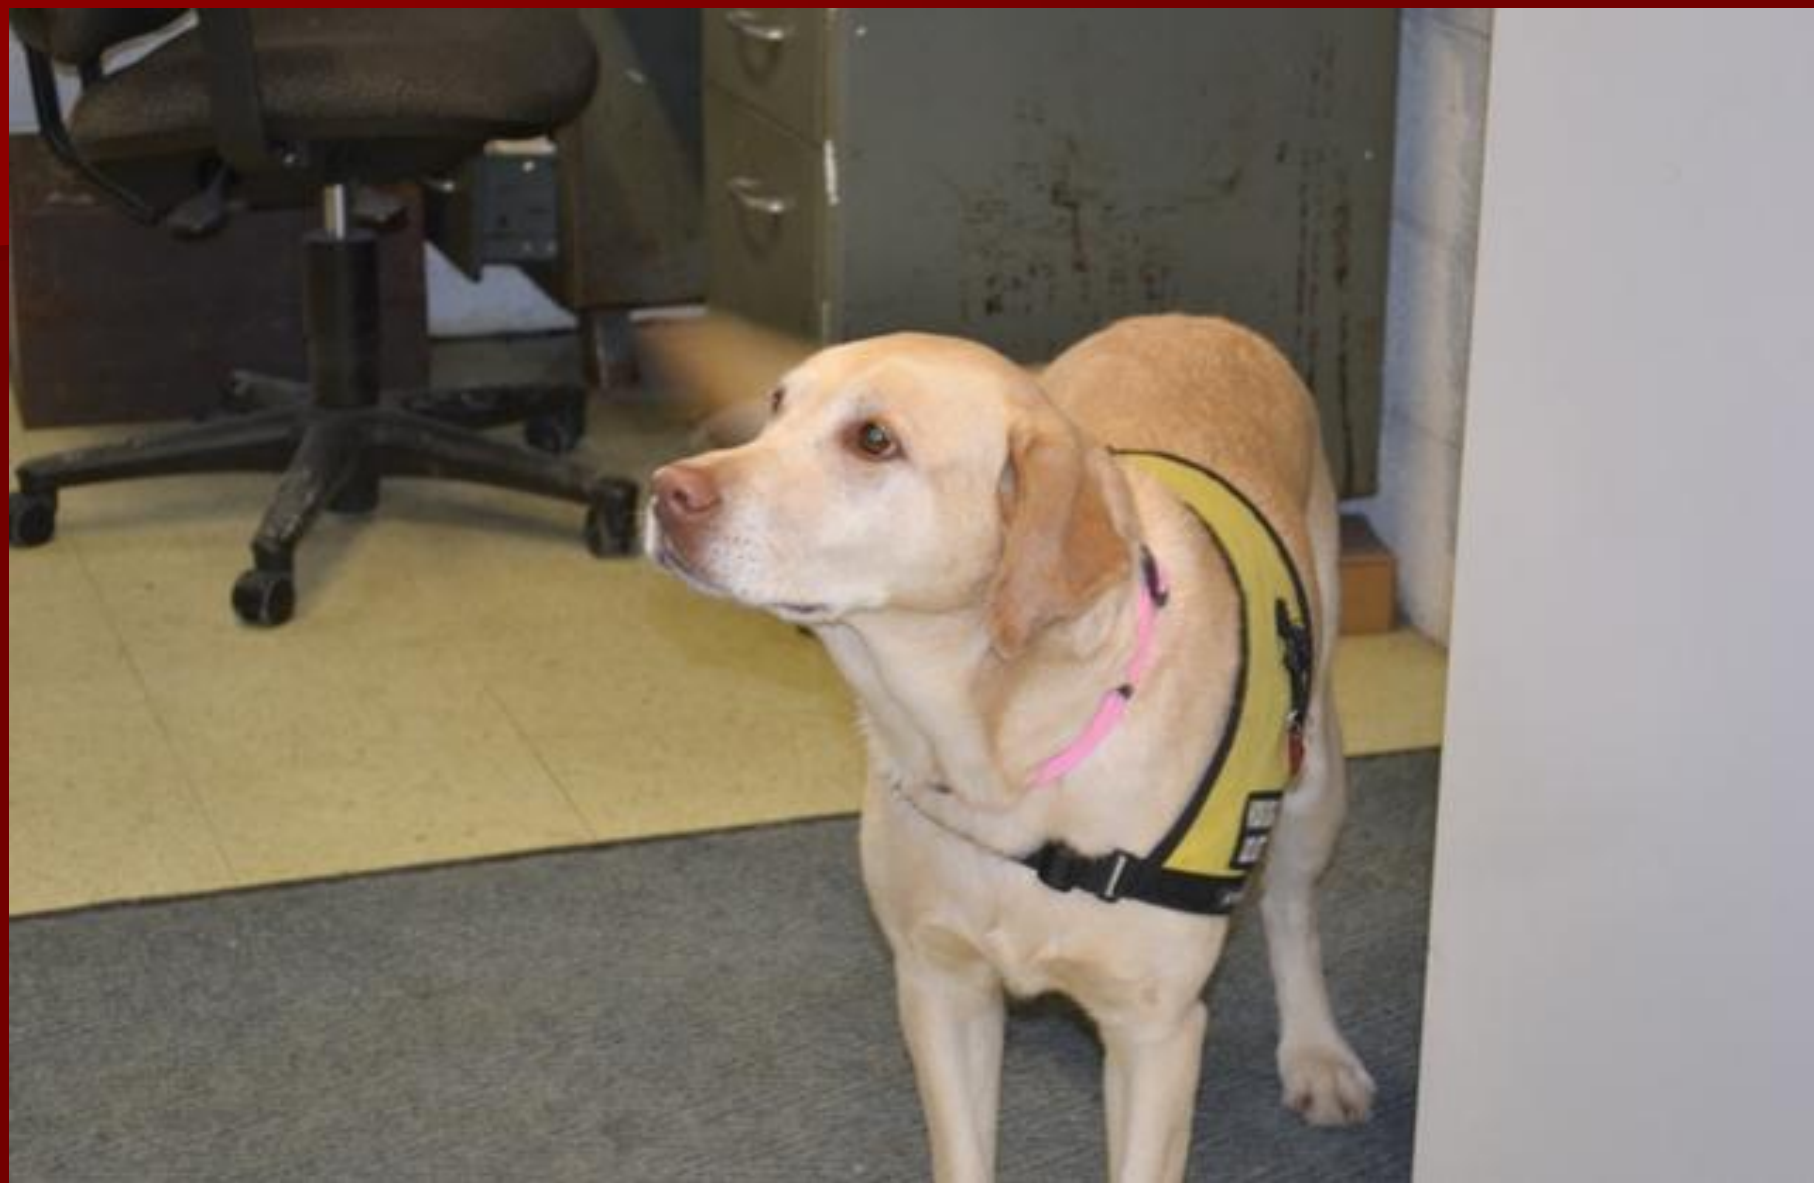

BELLA IS VISITING THIS THURSDAY & FRIDAY!

This **Thursday, July 14th & Friday, July 15th**, we have invited Bella and her handler Gary to support our pest control efforts by inspecting each of our rooms. She has incredible sniffing capacity and training which permits her to detect the possible presence of pests which are invisible to the human eye.

Suburban Extended Stay Indy NE was recently awarded the 2010 Inn of the Year award from Choice. Bella's visit is another example of how our team strives each day to use the latest technology and resources available to reach our goal of a superior guest experience for you.

Bella will enter your room during business hours on one of these days for a period of less than three minutes. She is a consummate professional, and has no detection training skills other than pests. We appreciate your cooperation and understanding as we are required to enter each room in the building.

Thank You!
